IAQ®
Your Total Facility Solutions Provider

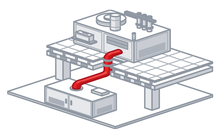

The cleanroom, and the whole fab around it.

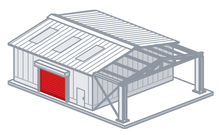

Three disciplines. One integrated solution.

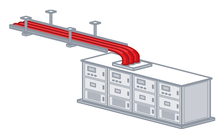

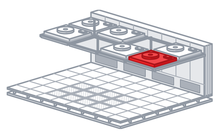

Engineering, Procurement & Construction

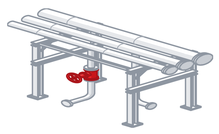

From conception to engineering and detailed design, construction, commissioning, completion and maintenance: one integrated solution across the facility's life.

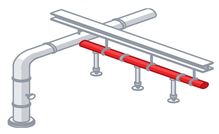

Tools hook-up

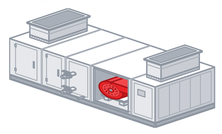

Civil, structural and architectural

HV, MV and LV electrical

Cleanroom

Process utilities

Fire protection

Air conditioning

Process Critical Utilities & Total Tool Installation Solutions

Process-critical utility infrastructure and total tool installation for semiconductor clients, from facility readiness to manufacturing start-up.

Process critical utilities

Water solutions
UPW plant and distribution, process waste drains, WWT, reclaim, ZLD, chemical storage tanks and dispensing

Chemical and slurry solutions
Bulk chemical, blending, dispense systems

Gas solutions
Bulk gas, specialty gas and abatement, bunker (NH3, SiH4, H2) and liquid dispense system

Process exhaust solutions
General, acid, caustic, solvent and calamity

Tool installation hook-up

Bulk gas
Specialty gas
Process chemicals
Ultra pure water
Process cooling water
Process drain
Process vacuum
High vacuum
Process exhaust
Gas detection and monitoring
Electrical power and controls

Energy Management

Energy management that helps clients run their facility efficiently and reduce its carbon footprint.

Operate and maintain

Full comprehensive maintenance, planned and unplanned
Non-comprehensive maintenance, planned only
HVAC system
Process equipment
Operational support
