Cleanrooms,
built layer by layer.

IAQ designs, builds and commissions cleanrooms and the facilities around them, then hooks up the tools inside and keeps them running.

Air handling
The unit and its duct above the ceiling

Fan filter units
A full grid, light panels between

Walls and tools
A door, a pass box and a viewing window

Raised floor
Perforated tiles on pedestals

Meet IAQ at SEMICON Europa 2026

Messe München, 10 to 13 November
Stand to confirm
